Supreme Council Of Omega Psi Phi Fraternity Urges Aid For India

The Supreme Council of the Omega Psi Phi Fraternity, representing chapters and membership in virtually every important city in the nation, at its spring meeting held in Washington, D. C., May 19th, announced its full support to India's need and urges the Congress of the U.S.A. to give immediate consideration to the Bill which would make available to the starving people of India the desired 2,000,000 tons of grain. The Fraternity further urges upon the Congress that this action, if taken without further delay, would constitute a major victory in the fight against the predatory forces of Soviet Communism. Food to India is more than a humanitarian gesture. It represents enlightened self-interest in a world where the forces of totalitarianism are constituting a major danger to democratic ideals. Our nation has assumed leadership in such a world. Let not that leadership falter.

House Approves Loan To India

WASHINGTON—(INS) — The House Thursday approved 283 to 94 a 190 million dollar loan to famine stricken India for purchasing food in the U. S.

The legislation was sent to conference with the Senate which passed a similar bill last week.

Purpose of the loan is to enable India to buy two million tons of grain and other foodstuffs, to feed her 350 million people.

The House bill directs the Economic Cooperation Administrator

to obtain from India "substantial" quantities of strategic materials "as far as practicable and possible." The materials are not specified.

The Senate measure contains a mandatory provision requiring India to furnish "substantial quantities" of Monazite sand, used in atomic production, and manganese, used in hardening steel.

Under both measures, the loan would be repayable probably in 35 years, the term usually set by ECA for American aid programs. The House added an amendment to its bill requiring India to use the funds in the U. S.
